Offer, Onboarding & Induction Playbook (HR)

From signed offer to the 90-day checkpoint: the joiner timeline HR owns day by buddy assignment and BGV gate-keeping.

REF	KB-HR-07
VERSION	V2.2
EFFECTIVE	01 APR 2026
FOR	HR TEAM ONLY
CLASSIFICATION	CONFIDENTIAL / HR INTERNAL

An assigned onboarding buddy cannot rescue a sloppy joining week — the checklist below is the guarantee. Use it as the master for every joiner; deviations (late BGV, deferred dates) are recorded in the onboarding ticket, not improvised.

1. Pre-joining (T-2 weeks)

- Offer accepted → trigger HRIS record creation, email id, and the document upload link on the same day.
- Track BGV per the verification SOP; flag risk profile (pending originals, employer mismatch) to TA + hiring manager early.
- Coordinate IT: laptop, licences, application access from the role access-templates — no bespoke access creation on Day 1.
- Send joining logistics (reporting time, contact person, location guide) one week ahead.

2. Day 1

Time	Item	Owner
Morning	Welcome, badge / access card, seat, welcome kit	Location HR
Late morning	HR induction: policies, benefits enrolment, code of conduct acknowledgement	HR Ops
Afternoon	IT set-up completion + MFA enrolment; email / chat sanity checks	IT
End of day	Manager meets the joiner; 30-60-90 goal-setting is scheduled (not necessarily complete)	Hiring manager
Same day	Onboarding ticket updated; BGV status unchanged	HR Ops

3. Week 1

- Buddy assigned by the manager (same org, not the manager) and logged in HRIS.
- Document set completed: ID proofs, education, previous employment, PF nomination, insurance dependants.
- Payroll cut-off aligned: the joiner appears in next-cycle input validation with a first-pay sanity check.
- Missing original documents: the probation-start clock notes it (see BGV SOP rules).

4. 30 / 60 / 90 checkpoints

HR owns the calendar; managers own the conversation. HR pings at T-2 days for each checkpoint, verifies the record exists, and flags systemic issues (three joiners missing a checkpoint from one manager, for example) to the business head.

5. Benefits enrolment

Everything election-based (dependants, family covers) happens within the first 30 days via the benefits portal — late elections create Q1 enrolment gaps that insurers will not reopen. HR pays particular attention at the 30-day joiner audit each cycle.
