Group Health Insurance — Employee Guide

Who is covered under the group health plan, what's included and excluded, how dependants, and the step-by-step claim and cashless process.

REF	KB-E-12
VERSION	V1.9
EFFECTIVE	01 APR 2026
FOR	ALL EMPLOYEES
CLASSIFICATION	INTERNAL / ALL EMPLOYEES

The company arranges group health cover with a leading insurer through a licensed TPA. This guide covers day-to-day use; the detailed policy wording and the plan sheet for your location live on the benefits portal.

1. Who is covered

- You — from your date of joining (enrolment within 30 days of joining).
- Your spouse, dependent children and, in the standard plan, up to two dependent parents — dependant definitions follow the insurer's sheet.
- Coverage for dependants completes when their enrolment form is submitted; anniversary change windows apply for late adds.

2. What's covered, briefly

- In-patient hospitalisation, daycare procedures and prescribed daycare treatments in network hospitals.
- Pre-hospitalisation (30/60 days) and post-hospitalisation expenses per plan sheet.
- Maternity and newborn cover for the employee and spouse up to the plan sub-limit.
- Ambulance charges up to plan cap; domiciliary care where specifically allowed.

3. What is not covered

Standard exclusions apply: non-prescribed treatments, cosmetic procedures, dental unless accident-related, self-inflicted harm, war-risk, and treatments during the waiting period on listed pre-existing conditions. The exclusion schedule in the policy wording is definitive.

4. Using cashless service at network hospitals

- Planned admission: notify the TPA at least 48 hours ahead; your e-card is on the benefits portal.
- Emergency: show the e-card at the hospital insurance desk; the TPA is notified within 24 hours.
- Network hospital + insured admission = majority of cases settle cashless without any reimbursement paperwork.

5. Reimbursement claims

If you use a non-network hospital or pay first, claim within 30 days of discharge: claim form, discharge summary, final bill, itemised bills for consumables, prescriptions, diagnostics and payment proof. Attach all of it in the claims portal — you get the settled amount (or deficiency note) within the TPA's service periods.

6. Common triggers and fixes

Situation	What to do
Marriage / childbirth	Add within 30 days via benefits portal (special enrolment)
Parent ageing out	Notify HR; parent becomes chargeable per exit norms
Exit from Emids	Cover ends on your last day; convert to retail policy through TPA portability
Claim rejected	Read the deficiency note in the portal; most are documentation gaps that can be re-filed

> The insurance helpdesk responds fastest through the portal; escalating to an HR ticket is the right path only when portal threads have stalled.
