Grievance Redressal Handling SOP (HR)

The internal playbook for managing non-statutory grievances: intake, triage, re
escalation thresholds and closure communication.

REF	KB-HR-04
VERSION	V1.3
EFFECTIVE	01 JAN 2026
FOR	HR TEAM ONLY
CLASSIFICATION	CONFIDENTIAL / HR INTERNAL

Grievances are workplace disputes that need resolution — not just answers. This SOP separates them administratively from disciplinary matters (which follow their own procedure) from service requests (which follow the ticket SLA).

1. Intake and classification

- Any ticket with grievance or interpersonal-conflict substance is triaged to the ER (employee relations) pod within 1 working day.
- Conduct allegations accompany grievance tickets: classify per the disciplinary procedure once facts are■■ discernible; when unsure, ER lead decides.
- Compensation disputes route to payroll; they are commonly simultaneously grievance (procedural fairness) and service (accuracy) issues — open two tracks when both exist.

2. The resolution ladder

Level	Forum	Timeline
L1	Manager + HR partner conversation	5 working days
L2	Formal review with ER pod; written position statements taken	10 working days
L3	HR-head review with all parties heard	15 working days
Review	Board-level / external facilitation for unresolved L3	Case by case

3. Standards through the process

- Both sides get versions of each other's statements; silence equals a decision without a hearing, and is not permitted.
- Interim safeguards (seating changes, reporting-line change) are available once allegations are on record, before any finding.
- Every escalation records the decision reason in writing; timelines extend only with documented consent of the involved parties.

4. Closure

Each grievance closes with a written summary to the involved parties (outcome, actions, follow-up) and a satisfaction checkout after 30 days. Complaints that return within 90 days on the same subject reopen at L2 with the previous file attached, not from scratch.
