Compensation Structure & Payment Policy

How salary structures are built at Emids, what each pay component means, pay statutory deductions, increments and how your pay is paid.

REF	KB-E-09
VERSION	V3.1
EFFECTIVE	01 APR 2026
FOR	ALL EMPLOYEES
CLASSIFICATION	INTERNAL / ALL EMPLOYEES

Your total compensation (CTC) is structured by grade and role from a company-wide band table, reviewed annually against market benchmarks. This document explains the anatomy of your pay, withholding rules and how pay behaves at each change; it does not contain band numbers (available from your HR partner on request).

1. Components of your pay

Component	What it means	Typical share
Basic	Fixed base pension-able salary	30–40% of fixed
House Rent Allowance (HRA)	Living / rent allowance component	40–50% of Basic
Special Allowance	Balancing fixed component	Balance of fixed pay
Variable / Performance Pay	Payout linked to level & performance cycle	5–20% of fixed, by level
Retirals & benefits	EPF employer share, gratuity provision, insurance premiums	Over and above fixed

2. Statutory and other deductions

- Provident Fund (EPF): employee 12% of (Basic + DA) capped by statutory wage ceiling.
- Professional Tax where applicable by state.
- TDS on salaries per your declared regime & investments; re-declaring at each cycle through the payroll portal.
- Voluntary programs (meal plan, NPS VCS, club membership) only with your opt-in.

3. Pay dates and payslips

Salary is paid on the 1st working day of the following calendar month (or agreed client-calendar date for deputed employees who are separately informed). Payslips appear on the payroll portal; see the Payroll Calendar & Payslip Guide (KB-E-10) for reading payslips and corrections.

4. Variable pay (performance-linked)

Variable targets and the payout % per rating band are published at cycle start. Payment is on the cycle close — typically May for the annual cycle — and prorated by presence during the cycle (joiners, exits per the exit policy). Company or unit gate (for example performance of business unit modulating the pool by up to 25%) is communicated the same cycle.

5. Increments and promotions

Increments take effect on your confirmation date or promotion date, whichever is latest within the annual cycle. Increment amounts flow from the merit matrix; promotion adjustments additionally in the new band. Off-cycle corrections use the salary-correction channel in the ticket portal, and ideally before the month's payroll cut-off on the 20th.

6. View and correct

For clarity on any pay component, the payslip guide (KB-E-10) is the first stop, then a payroll ticket — a response on tickets is due within the SLA published in the HR Ticket SLA (HR-internal), and pay corrections are audited before they are processed.

> Details of your own grade, band and structure live in your offer letter and its amendments; HR can share your current structure statement at any time on request.
