6. Enrolling and using benefits

Most benefits enrol automatically at joining; election ones (dependants, family add-ons, accrued meal-plan top-ups) are set in the benefits portal window each April. Enrolment window misses default to standard individual cover; special enrolment (marriage, child birth) within 30 days of the event.

> Benefits carry tax: components received in cash (allowance-style benefits) are added to salary for tax; insurance premiums paid by the company are not taxable to you.
